hazardous waste listed in Subpart D of P	art 261 of 40 CFR (Subpart D ident	ous waste because it has been mixed with halogenated tifies the Hazardous Wastes from non-specific sources – the F

Waste Codes). The Generator may rebut this presumption by "demonstrating" that the Used Oil does not contain hazardous waste (for example, by knowledge or using an analytical method from SW-846, Edition III, to show that the Used Oil does not contain a significant concentration of halogenated hazardous constituents listed in Appendix VIII of 40 CFR Part 261).

This document is not designed as a stand-alone guide to "Used Oil" 40 CFR Part 279. If additional guidance is needed please refer to your State Agency or your Tradebe Representative may assist you.
